## Continuation Sheet (PTOL-303) 09/314,629

Continuation of 2. NOTE: The amended claims include new limitations that will require further search and consideration. Specifically, the new claims point out that a single set of meta-level information is used to generate setup information for all network devices. This limitation was not included in previous claims and will require further search and consideration by the examiner. Also, please note that in the previous interview, the Primary examiner point out that if this limitation is included in an After Final amendment, the amendment would not be entered because of the new limitations. Also, note that although the applicant states that in the previous interview "it was agreed that the Amendment would overcome the references of record" (page 8, paragraph 3), the examiner did not agree to this. As stated in the Interview Summary (paper no. 14), "After a cursory review by the primary examiner, an amendment including this feature would appear to overcome the Hansen (USPN 5,838,907) reference." Whether or not this definitively overcomes the Hansen (USPN 5,838,907) reference will require consideration. All further arguments are based on the amendment that is not entered.
